

Recently at the ashram the phenomenon of Energy Orbs has become more and more visible. These beautiful representations of planetary energy are becoming manifest in response to the ever-growing level of consciousness present at this time. The pictures shown here taken at the ashram and around Ratu were taken by many people, on many cameras at different times. They capture the essence of these energies at play. Feeling their presence and working with them during training and meditating allows one to connect with our highest potential, free from the limits of the mind. When one is connected through feeling to these energy orbs spinning throughout the body occurs, while held in the safety of one's own orbit, it can feel like dancing through the universe.
